

Frequently asked questions

What is SMSme?

SMSme is a web-based bulk SMS/Txt application that allows our registered users to SMS individuals or groups from the comfort of their own home or on location using a laptop or even web-enabled mobile phones. All you need is an internet connection that enables you to navigate to our homepage.

SMSme and its uses

SMSme is ideal for individuals, teams or organizations that need to communicate immediately and effectively. For example: A golf club may use SMSme to advise members on tee off times and availability. A Soccer team manager may use SMSme to advise their team of cancellation of training due to bad weather.

There are literally hundreds of applications for SMSme. No more fumbling with mobile phones trying to send bulk texts, or using email to contact clients only to find it is never read.

Costs

Traditional Pay per use service

SMSme SMS's are at a cheaper price as most market suppliers – 0.20c per text. There are discounts for bulk usage. We also use local carriers for our SMS service unlike many of our competitors who use overseas SMS suppliers. Each SMS has 160 characters message space available

Why us?

It costs you nothing to use our software. Some carriers give users 'reward' texts and you may say to yourself that you could use them instead of our program BUT they are your own and with SMSme, at least you can easily strip out business texts from your personal texts for tax purposes. And our service is a lot more convenient – why fumble through your mobile phone when you can text from your PC?
